

- 627 Pushing the Volcanic Explosivity Index to its limit and beyond: Constraints from exceptionally weak explosive eruptions at Kīlauea in 2008**  
B.F. Houghton, D.A. Swanson, J. Rausch, R.J. Carey, S.A. Fagents, and T.R. Orr
- 631 Biogeographical and ecological patterns in bryozoans across the Cretaceous-Paleogene boundary: Implications for the phytoplankton collapse hypothesis**  
Caroline E. Sogot, Elizabeth M. Harper, and Paul D. Taylor
- 635 Mantle upwelling and initiation of rift segmentation beneath the Afar Depression**  
J.O.S. Hammond, J.-M. Kendall, G.W. Stuart, C.J. Ebinger, I.D. Bastow, D. Keir, A. Ayele, M. Belachew, B. Goitom, G. Ogubazghi, and T.J. Wright
- 639 Holocene scarp on the Sawtooth fault, central Idaho, USA, documented through lidar topographic analysis**  
Glenn D. Thackray, David W. Rodgers, and David Streutker
- 643 Garnet growth as a proxy for progressive subduction zone dehydration**  
Ethan F. Baxter and Mark J. Caddick
- 647 A new paleothermometer for forest paleosols and its implications for Cenozoic climate**  
Timothy M. Gallagher and Nathan D. Sheldon
- 651 Carbon isotopic analyses of ca. 3.0 Ga microstructures imply planktonic autotrophs inhabited Earth's early oceans**  
C.H. House, D.Z. Oehler, K. Sugitani, and K. Mimura
- 655 Stability of the nitrogen cycle during development of sulfidic water in the redox-stratified late Paleoproterozoic Ocean**  
Linda V. Godfrey, Simon W. Poulton, Gray E. Bebout, and Philip W. Fralick
- 659 Intermediate-depth earthquakes facilitated by eclogitization-related stresses**  
Junichi Nakajima, Naoki Uchida, Takahiro Shiina, Akira Hasegawa, Bradley R. Hacker, and Stephen H. Kirby
- 663 Sulfur isotope systematics of a euxinic, low-sulfate lake: Evaluating the importance of the reservoir effect in modern and ancient oceans**  
Maya L. Gomes and Matthew T. Hurtgen
- 667 North Atlantic versus Southern Ocean contributions to a deglacial surge in deep ocean ventilation**  
L.C. Skinner, A.E. Scrivner, D. Vance, S. Barker, S. Fallon, and C. Waelbroeck
- 671 What drove continued continent-continent convergence after ocean closure? Insights from high-resolution seismic-reflection profiling across the Daba Shan in central China**  
Shuwen Dong, Rui Gao, An Yin, Tonglou Guo, Yueqiao Zhang, Jianmin Hu, Jianhua Li, Wei Shi, and Qiusheng Li
- 675 Fill and spill of giant lakes in the eastern Valles Marineris region of Mars**  
Nicholas H. Warner, Mariam Sowe, Sanjeev Gupta, Alexander Dumke, and Kate Goddard
- 679 Fluid mixing forms basement-hosted Pb-Zn deposits: Insight from metal and halogen geochemistry of individual fluid inclusions**  
Tobias Fusswinkel, Thomas Wagner, Markus Wälle, Thomas Wenzel, Christoph A. Heinrich, and Gregor Markl
- 683 Quantitative mapping of the oxidative effects of mantle metasomatism**  
Andrew J. Berry, Gregory M. Yaxley, Brendan J. Hanger, Alan B. Woodland, Martin D. de Jonge, Daryl L. Howard, David Paterson, and Vadim S. Kamenetsky
- 687 Cooling of the Bushveld Complex, South Africa: Implications for paleomagnetic reversals**  
R. Grant Cawthorn and Susan J. Webb
- 691 Evidence for an African-Iberian mammal dispersal during the pre-evaporitic Messinian**  
Luis Gibert, Gary R. Scott, Plini Montoya, Francisco J. Ruiz-Sánchez, Jorge Morales, Luis Luque, Juan Abella, and María Lería
- 695 Reach-scale river dynamics moderate the impact of rapid Holocene climate change on floodwater farming in the desert Nile**  
Mark G. Macklin, Jamie C. Woodward, Derek A. Welsby, Geoff A.T. Duller, Frances M. Williams, and Martin A.J. Williams
- 699 Potentially induced earthquakes in Oklahoma, USA: Links between wastewater injection and the 2011  $M_w$  5.7 earthquake sequence**  
Katie M. Keranen, Heather M. Savage, Geoffrey A. Abers, and Elizabeth S. Cochran
- 703 Nanograins form carbonate fault mirrors**  
Shalev Siman-Tov, Einat Aharonov, Amir Sagy, and Simon Emmanuel
- 707 Combined bromine and chlorine release from large explosive volcanic eruptions: A threat to stratospheric ozone?**  
S. Kutterolf, T.H. Hansteen, K. Appel, A. Freundt, K. Krüger, W. Pérez, and H. Wehrmann
- 711 A simple mechanism for mid-crustal shear zones to record surface-derived fluid signatures**  
Tom Raimondo, Chris Clark, Martin Hand, John Cliff, and Robert Anczkiewicz
- 715 Continental delamination and mantle dynamics drive topography, extension and fluid discharge in the Apennines**  
Claudio Chiarabba and Giovanni Chiodini
- 719 RESEARCH FOCUS: Nano-powder coating can make fault surfaces smooth and shiny: implications for fault mechanics?**  
Nicola De Paola

# GEOLOGY

GEOLOGY publishes timely, innovative, and provocative articles relevant to its international audience, representing research from all fields of the geosciences.

**GEOLOGY** (ISSN 0091-7613 USPS 994-580 CODEN GLGYB) is published monthly by the Geological Society of America, Inc. (GSA), with offices at 3300 Penrose Place, Boulder, Colorado, USA. Mailing address is P.O. Box 9140, Boulder, CO 80301-9140, USA. Periodicals postage paid at Boulder, Colorado, and at additional mailing offices. Postmaster: Send address changes to *Geology*, Sales & Service, P.O. Box 9140, Boulder, CO 80301-9140, USA.

Copyright © 2013, The Geological Society of America, Inc. (GSA). All rights reserved. Copyright not claimed on content prepared wholly by U.S. government employees within the scope of their employment. Individual scientists are hereby granted permission, without fees or further requests to GSA, to use a single figure, a single table, and/or a brief paragraph of text in other subsequent works and to make unlimited photocopies of items in this journal for noncommercial use in classrooms to further education and science. In addition, an author has the right to use his or her article or a portion of the article in a thesis or dissertation without requesting permission from GSA, provided the bibliographic citation and the GSA copyright credit line are given on the appropriate pages. For any other form of capture, reproduction, and/or distribution of any item in this journal by any means, contact: Permissions, GSA, P.O. Box 9140, Boulder, CO 80301-9140, USA, fax +1-303-357-1073, editing@geosociety.org; reference *Geology*, ISSN 0091-7613. Permission is granted to authors to post the abstracts only of their articles on their own or their organization's Web site providing the posting includes this reference: "The full paper was published in the Geological Society of America's journal *Geology*, [include year, month, and page numbers, if known, where the article appears or will appear]."

GSA provides this and other forums for the presentation of diverse opinions and positions by scientists worldwide, regardless of their race, citizenship, gender, religion, sexual orientation, or political viewpoint. Opinions presented in this publication do not reflect official positions of the Society.

**SUBSCRIPTIONS** for 2013 calendar year. GSA Members and Fellows: \$89 (print + online), \$89 (international print + online), \$60 (online only). GSA Student and K-12 Teacher Members: \$45 (print only; online included in membership). Nonmembers and institutions: \$965 (print + online). Details on subscription choices, formats, and pricing, at [www.geosociety.org/pubs/](http://www.geosociety.org/pubs/). For all orders, call GSA Sales & Service at +1.888.443.4472 or +1.303.357.1000, or e-mail [gsaservice@geosociety.org](mailto:gsaservice@geosociety.org). Claims: for nonreceipt or damaged copies, please contact GSA Sales & Service. Claims are honored for one year; please allow sufficient delivery time (up to 8 weeks) for overseas copies.

**COVER:** A cheilostome bryozoan colony (*Anornithopora spooneri*) from the late Maastrichtian Prairie Bluff Chalk, Mississippi, USA. Cheilostomes were the dominant bryozoan clade in this region across the Cretaceous-Paleogene mass extinction. See "Biogeographical and ecological patterns in bryozoans across the Cretaceous-Paleogene boundary: Implications for the phytoplankton collapse hypothesis" by Sogot et al., p. 631–634.
