

GEOLOGY

OCTOBER 2015 | VOLUME 43 | NUMBER 10

- 851 Global thrust faulting on the Moon and the influence of tidal stresses**
Thomas R. Watters, Mark S. Robinson, Geoffrey C. Collins, Maria E. Banks, Katie Daud, Nathan R. Williams, and Michelle M. Selvens
- 855 Are the large filamentous microfossils preserved in Messinian gypsum colorless sulfide-oxidizing bacteria?**
Francesco Dela Pierre, Marcello Natalicchio, Simona Ferrando, Roberto Giustetto, Daniel Birgel, Giorgio Carnevale, Susanne Gier, Francesca Lozar, Domenica Marabello, and Jörn Peckmann
- 859 Direct stratigraphic dating of India-Asia collision onset at the Selandian (middle Paleocene, 59 ± 1 Ma)**
Xiumian Hu, Eduardo Garzanti, Ted Moore, and Isabella Raffi
- 863 Carbon sequestration on Mars**
Christopher S. Edwards and Bethany L. Ehlmann
- 867 More than a trace of oxygen: Ichnological constraints on the formation of the giant Zn-Pb-Ag \pm Ba deposits, Red Dog district, Alaska**
Merilie A. Reynolds, Murray K. Gingras, Sarah A. Gleeson, and James U. Stemler
- 870 Statement of Ownership**
- 871 Experimental evidence for rock layering development by pressure solution**
Jean-Pierre Gratier, Catherine Noiriel, and François Renard
- 875 Episodic overbank deposition as a dominant mechanism of floodplain and delta-plain aggradation**
Zhixiong Shen, Torbjörn E. Törnqvist, Barbara Mauz, Elizabeth L. Chamberlain, Austin G. Nijhuis, and Laure Sandoval
- 879 Oxygen isotope mass-balance constraints on Pliocene sea level and East Antarctic Ice Sheet stability**
Matthew J. Winnick and Jeremy K. Caves
- 883 Transient changes of landslide rates after earthquakes**
O. Marc, N. Hovius, P. Meunier, T. Uchida, and S. Hayashi
- 887 Antarctic microbial mats: A modern analog for Archean lacustrine oxygen oases**
Dawn Y. Sumner, Ian Hawes, Tyler J. Mackey, Anne D. Jungblut, and Peter T. Doran
- 891 Mantle strength of the San Andreas fault system and the role of mantle-crust feedbacks**
Vasileios Chatzaras, Basil Tikoff, Julie Newman, Anthony C. Withers, and Martyn R. Drury
- 895 Seafloor cratering and sediment remolding at sites of fluid escape**
Matt O'Regan, Matthias Forwick, Martin Jakobsson, Kathryn Moran, and David Mosher
- 899 Precambrian reidite discovered in shocked zircon from the Stac Fada impactite, Scotland**
S.M. Reddy, T.E. Johnson, S. Fischer, W.D.A. Rickard, and R.J.M. Taylor
- 903 Crystallization of platinum-group minerals from silicate melts: Evidence from Cr-spinel-hosted inclusions in volcanic rocks**
Vadim S. Kamenetsky, Jung-Woo Park, James E. Mungall, Evgeny V. Pushkarev, Alexei V. Ivanov, Maya B. Kamenetsky, and Gregory M. Yaxley
- 906 ERRATUM: Microbial nucleation of Mg-rich dolomite in exopolymeric substances under anoxic modern seawater salinity: New insight into an old enigma**
Stefan Krause, Volker Liebetrau, Stanislav Gorb, Mónica Sánchez-Román, Judith A. McKenzie, and Tina Treude
- 907 A contourite drift system on the Baffin Bay–West Greenland margin linking Pliocene Arctic warming to poleward ocean circulation**
Paul C. Knutz, John R. Hopper, Ulrik Gregersen, Tove Nielsen, and Peter Japsen
- 911 Evolution of recycled crust within the mantle: Constraints from the garnet pyroxenites of the External Ligurian ophiolites (northern Apennines, Italy)**
Alessandra Montanini and Riccardo Tribuzio
- 915 Focused fluid transfer through the mantle above subduction zones**
Cassian Pirard and Joerg Hermann
- 919 Tracking changes in crustal thickness during orogenic evolution with Sr/Y: An example from the North American Cordillera**
James B. Chapman, Mihai N. Ducea, Peter G. DeCelles, and Lucia Profeta
- 923 Fault strength in thin-skinned tectonic wedges across the smectite-illite transition: Constraints from friction experiments and critical tapers**
Telemaco Tesei, Brice Lacroix, and Cristiano Collettini
- 927 The impact of dynamic topography change on Antarctic ice sheet stability during the mid-Pliocene warm period**
Jacqueline Austermann, David Pollard, Jerry X. Mitrovica, Robert Moucha, Alessandro M. Forte, Robert M. DeConto, David B. Rowley, and Maureen E. Raymo
- 931 South Atlantic opening: A plume-induced breakup?**
T. Fromm, L. Planert, W. Jokat, T. Ryberg, J. H. Behrmann, M.H. Weber, and Christian Haberland
- 935 Cracking the olivine zoning code: Distinguishing between crystal growth and diffusion**
Thomas Shea, Kendra J. Lynn, and Michael O. Garcia
- 939 Is the vertebrate-defined Permian-Triassic boundary in the Karoo Basin, South Africa, the terrestrial expression of the end-Permian marine event?**
Robert A. Gastaldo, Sandra L. Kamo, Johann Neveling, John W. Geissman, Marion Bamford, and Cindy V. Looy
- 943 RESEARCH FOCUS: The absence of evidence of absence of the East Antarctic Ice Sheet**
Greg Balco

GEOLOGY

GEOLOGY publishes timely,
innovative, and provocative articles
relevant to its international audience,
representing research from
all fields of the geosciences.

GEOLOGY (ISSN 0091-7613 USPS 994-580 CODEN GLGYB) is published monthly by the Geological Society of America, Inc. (GSA), with offices at 3300 Penrose Place, Boulder, Colorado, USA. Mailing address is P.O. Box 9140, Boulder, CO 80301-9140, USA. Periodicals postage paid at Boulder, Colorado, and at additional mailing offices. Postmaster: Send address changes to *Geology*, Sales & Service, P.O. Box 9140, Boulder, CO 80301-9140, USA.

Copyright not claimed on content prepared wholly by U.S. government employees within the scope of their employment. Individual scientists are hereby granted permission, without fees or further requests to GSA, to use a single figure, a single table, and/or a brief paragraph of text in other subsequent works and to make unlimited photocopies of items in this journal for noncommercial use in classrooms to further education and science. In addition, an author has the right to use his or her article or a portion of the article in a thesis or dissertation without requesting permission from GSA, provided the bibliographic citation and the GSA copyright credit line are given on the appropriate pages. For any other form of capture, reproduction, and/or distribution of any item in this journal by any means, contact: Permissions, GSA, P.O. Box 9140, Boulder, CO 80301-9140, USA, fax +1-303-357-1073, editing@geosociety.org; reference *Geology*, ISSN 0091-7613. Permission is granted to authors to post the abstracts only of their articles on their own or their organization's Web site providing the posting includes this reference: "The full paper was published in the Geological Society of America's journal *Geology*, [include year, month, and page numbers, if known, where the article appears or will appear]."

GSA provides this and other forums for the presentation of diverse opinions and positions by scientists worldwide, regardless of their race, citizenship, gender, religion, sexual orientation, or political viewpoint. Opinions presented in this publication do not reflect official positions of the Society.

SUBSCRIPTIONS for 2015 calendar year. GSA Members and Fellows: \$89 (print + online), \$89 (international print + online), \$60 (online only). GSA Student and K–12 Teacher Members: \$45 (print only; online included in membership). Nonmembers and institutions: \$1075 (print + online). Details on subscription choices, formats, and pricing, at www.geosociety.org/pubs/. For all orders, call GSA Sales & Service at +1.888.443.4472 or +1.303.357.1000, or e-mail gsaservice@geosociety.org. Claims: for nonreceipt or damaged copies, please contact GSA Sales & Service. Claims are honored for one year; please allow sufficient delivery time (up to 8 weeks) for overseas copies.

COVER: Ongoing debris fall mobilizing rock and dust from a landslide deposit due to the 2015 Gorkha, Nepal, earthquake (M_w 7.9). On the forefront (on the left), on the banks of the Upper Bhoté Koshi river, collapsed houses and poles are visible, as well as other landslide deposits from the main shock and following aftershocks. This ongoing fall started without any determined trigger. See "Transient changes of landslide rates after earthquakes" by Marc et al., p. 883–886.

Statement of Ownership, Management, and Circulation

(Required by Title 39 U.S.C. 4369)

Geology (Publication No. 0091-7613) is published monthly by The Geological Society of America, Inc., (GSA) with headquarters and offices at 3300 Penrose Place, Boulder, Colorado 80301, U.S.A., and mailing address of Post Office Box 9140, Boulder, Colorado 80301-9140, U.S.A. The Publisher is Jeanette Hammann; the Managing Editor is Lyne Yohe; their offices and mailing addresses are the same as above. The annual subscription prices are: GSA Members \$89; GSA Student/K-12 Teacher Members \$45; non-members \$1,075. The publication is wholly owned by The Geological Society of America, Inc., a not-for-profit, charitable corporation. No known stockholder holds 1-percent or more of the total stock. There are no known mortgagees or holders of other securities. The purpose, function, and non-profit status of The Geological Society of America, Inc., has not changed during the preceding twelve months. The average number of copies of each issue during the preceding twelve months and the actual number of copies published nearest to the filing date (September 2015 issue) are noted at right.

The information taken from PS Form 3526, signed 17 September 2015, by the Publisher, Jeanette Hammann, and filed with the United States Postal Service in Boulder, Colorado.

Item No. from PS Form 3526	Avg. No. Copies Each Issue in Past 12 Months	Actual No. Copies of Single Issue Published Nearest to Filing Date
15. Extent and Nature of Circulation		
a. Total number of copies (<i>net press run</i>)	2,769	2,700
b. Legitimate paid and/or requested distribution (<i>by mail and outside the mail</i>)	2,351	2,466
c. Total paid and/or requested circulation	2,351	2,466
d. Nonrequested distribution (<i>by mail and outside the mail</i>)	0	0
e. Total nonrequested distribution	0	0
f. Total distribution (<i>sum of c and e</i>)	2,351	2,466
g. Copies not distributed (<i>office use, leftovers, spoiled</i>)	418	234
h. Total (<i>sum of f and g</i>)	2,769	2,700
i. Percent paid and/or requested circulation ($c/f \times 100$)	100%	100%
