

GEOLOGY

MAY 2017 | VOLUME 45 | NUMBER 5

- 387 A Laurentian record of the earliest fossil eukaryotes**
Zachary R. Adam, Mark L. Skidmore, David W. Mogk, and Nicholas J. Butterfield
- 391 The basement revealed: Tectonic insight from a digital elevation model of the Great Unconformity, USA cratonic platform**
Stephen Marshak, Stefanie Domrois, Curtis Abert, Timothy Larson, Gary Pavlis, Michael Hamburger, Xiaotao Yang, Hersh Gilbert, and Chen Chen
- 395 Extinction selectivity among marine fishes during multistressor global change in the end-Permian and end-Triassic crises**
Priscilla Vázquez and Matthew E. Clapham
- 399 Evidence from paleosols for low to moderate elevation of the India-Asia suture zone during mid-Cenozoic time**
Ryan J. Leary, Jay Quade, Peter G. DeCelles, and Amanda Reynolds
- 403 Widespread persistence of expanded East Antarctic glaciers in the southwest Ross Sea during the last deglaciation**
Jae Il Lee, Robert M. McKay, Nicholas R. Golledge, Ho Il Yoon, Kyu-Cheul Yoo, Hyoung Jun Kim, and Jong Kuk Hong
- 407 Zircon Hf-O isotope evidence for recycled oceanic and continental crust in the sources of alkaline rocks**
Yu-Sheng Zhu, Jin-Hui Yang, Jin-Feng Sun, and Hao Wang
- 411 Tracing weathering regimes using the lithium isotope composition of detrital sediments**
Mathieu Dellinger, Julien Bouchez, Jérôme Gaillardet, Laetitia Faure, and Julien Moureau
- 415 Seismogenic deformation between the Sierran microplate and Oregon Coast block, California, USA**
Jeffrey Unruh and James Humphrey
- 419 Anomalous sulfur isotopes trace volatile pathways in magmatic arcs**
Vikraman Selvaraja, Marco L. Fiorentini, Crystal K. LaFlamme, Boswell A. Wing, and Thi-Hao Bui
- 422 ERRATUM: CO₂ diffusion into pore spaces limits weathering rate of an experimental basalt landscape**
Joost van Haren, Katerina Dontsova, Greg A. Barron-Gafford, Peter A. Troch, Jon Chorover, Stephen B. DeLong, David D. Breshears, Travis E. Huxman, Jon D. Pelletier, Scott R. Saleska, Xubin Zeng, and Joaquin Ruiz
- 422 ERRATUM: Location, location, location: The variable lifespan of the Laramide orogeny**
Peter Copeland, Claire A. Currie, Timothy F. Lawton, and Michael A. Murphy
- 423 Gypsum gravel devils in Chile: Movement of largest natural grains by wind?**
Kathleen C. Benison
- 427 Tectonic mélange records the Silurian–Devonian subduction-metamorphic process of the southern Dunhuang terrane, southernmost Central Asian Orogenic Belt**
Hao Y.C. Wang, Hong-Xu Chen, Qian W.L. Zhang, Meng-Yan Shi, Quan-Ren Yan, Quan-Lin Hou, Qing Zhang, Timothy Kusky, and Chun-Ming Wu
- 431 Structure and dynamics of surface uplift induced by incremental sill emplacement**
Craig Magee, Ian D. Bastow, Benjamin van Wyk de Vries, Christopher A.-L. Jackson, Rachel Hetherington, Miruts Hagos, and Murray Hoggett
- 435 Millennial-scale hydroclimate variations in southwest China linked to tropical Indian Ocean since the Last Glacial Maximum**
Enlou Zhang, Cheng Zhao, Bin Xue, Zhonghui Liu, Zicheng Yu, Rong Chen, and Ji Shen
- 439 Evolution of seaward-dipping reflectors at the onset of oceanic crust formation at volcanic passive margins: Insights from the South Atlantic**
D.A. Paton, J. Pindell, K. McDermott, P. Bellingham, and B. Horn
- 443 The role of F-clinohumite in volatile recycling processes in subduction zones**
Tobias Grützner, Stephan Klemme, Arno Rohrbach, Fernanda Gervasoni, and Jasper Berndt
- 447 The transitional climate of the late Miocene Arctic: Winter-dominated precipitation with high seasonal variability**
Brian A. Schubert, A. Hope Jahren, Sergei P. Davydov, and Sophie Warny
- 451 Seismic imaging of magma sills beneath an ultramafic-hosted hydrothermal system**
J. Pablo Canales, Robert A. Dunn, Ryuta Arai, and Robert A. Sohn
- 455 Ina pit crater on the Moon: Extrusion of waning-stage lava lake magmatic foam results in extremely young crater retention ages**
Le Qiao, James Head, Lionel Wilson, Long Xiao, Mikhail Kreslavsky, and Josef Dufek
- 459 A deep root for the Cambrian explosion: Implications of new bio- and chemostratigraphy from the Siberian Platform**
M. Zhu, A.Yu. Zhuravlev, R.A. Wood, F. Zhao, and S.S. Sukhov
- 463 Variable thermal loading and flexural uplift along the Transantarctic Mountains, Antarctica**
Gregory R. Brenn, Samantha E. Hansen, and Yongcheol Park
- 467 Potassium-rich magmatism from a phlogopite-free source**
Yu Wang, Stephen F. Foley, and Dejan Prelević
- 471 Origin of the dunitic mantle-crust transition zone in the Oman ophiolite: The interplay between percolating magmas and high-temperature hydrous fluids**
Mathieu Rospabé, Georges Ceuleneer, Mathieu Benoit, Bénédicte Abily, and Patrick Pinet
- 475 Massive volcanism, evaporite deposition, and the chemical evolution of the Early Cretaceous ocean**
Jennifer V. Mills, Maya L. Gomes, Brian Kristall, Bradley B. Sageman, Andrew D. Jacobson, and Matthew T. Hurtgen
- 479 RESEARCH FOCUS: Of kangaroo rats and gypsum gravel: Probing the extremes of aeolian transport in the present and the past**
Nicholas G. Heavens

GEOLOGY

GEOLOGY publishes timely, innovative, and provocative articles relevant to its international audience, representing research from all fields of the geosciences.

GEOLOGY (ISSN 0091-7613 USPS 994-580 CODEN GLGYB) is published monthly by the Geological Society of America, Inc. (GSA), with offices at 3300 Penrose Place, Boulder, Colorado, USA. Mailing address is P.O. Box 9140, Boulder, CO 80301-9140, USA. Periodicals postage paid at Boulder, Colorado, and at additional mailing offices. Postmaster: Send address changes to *Geology*, Sales & Service, P.O. Box 9140, Boulder, CO 80301-9140, USA.

Copyright © 2017, The Geological Society of America, Inc. (GSA). All rights reserved. Copyright not claimed on content prepared wholly by U.S. government employees within the scope of their employment. Individual scientists are hereby granted permission, without fees or further requests to GSA, to use a single figure, a single table, and/or a brief paragraph of text in other subsequent works and to make unlimited photocopies of items in this journal for noncommercial use in classrooms to further education and science. In addition, an author has the right to use his or her article or a portion of the article in a thesis or dissertation without requesting permission from GSA, provided the bibliographic citation and the GSA copyright credit line are given on the appropriate pages. For any other form of capture, reproduction, and/or distribution of any item in this journal by any means, contact: Permissions, GSA, P.O. Box 9140, Boulder, CO 80301-9140, USA, fax +1-303-357-1073, editing@geosociety.org; reference *Geology*, ISSN 0091-7613. Permission is granted to authors to post the abstracts only of their articles on their own or their organization's Web site providing the posting includes this reference: "The full paper was published in the Geological Society of America's journal *Geology*, [include year, month, and page numbers, if known, where the article appears or will appear]."

GSA provides this and other forums for the presentation of diverse opinions and positions by scientists worldwide, regardless of their race, citizenship, gender, religion, sexual orientation, or political viewpoint. Opinions presented in this publication do not reflect official positions of the Society.

SUBSCRIPTIONS for 2017 calendar year. All GSA Members will receive free online access to *Geology* with their membership. Prices for print subscriptions: Members and Fellows: \$89; Student, K-12 Teacher, and Early Career Professional Members: \$45. Nonmembers and institutions: \$1,185 (print + online). Details on subscription choices, formats, and pricing at www.geosociety.org/pubs/. For all orders, call GSA Sales & Service at +1.888.443.4472 or +1.303.357.1000, or e-mail gsaservice@geosociety.org. Claims: for nonreceipt or damaged copies, please contact GSA Sales & Service. Claims are honored for one year; please allow sufficient delivery time (up to 8 weeks) for overseas copies.

COVER: The Mountaineer Range in Antarctica, composed of Cambrian-Ordovician granitoids of the Granite Harbour Intrusive Complex, rises over 1 km above the Aviator Glacier trough. A solar panel protrudes from five feet of snow accumulated above a broadband seismometer from the TAMNET seismic array, which was deployed from 2012 to 2015 to investigate the crustal and upper mantle structure beneath the mountain range. Air support was provided by the United States Antarctic Program and Kenn Borek Air Ltd.
